

Movilitas^{CLOUD}

Make serialization and traceability simple throughout the supply chain

WHAT IS IT?

Movilitas.Cloud is a SaaS platform for managing serialization and aggregation of **pharmaceutical products** to comply with legislation for medicines around the globe.

It allows for **full Track & Trace**, from packaging till dispensing to a patient.

WHAT DOES IT DO?

Serialized Manufacturing allows companies responsible for packing medicines to:

- **Manage serial numbers** for trade items and logistics units
- Manage **aggregations** (bundles, cases, pallets)
- **Print** serialized labels
- Manage packaging orders for **production lines**
- Complete **history** of every serial number
- **Onboarding** of CMO and/or MAH

Serialized Logistics allows companies responsible for distribution and dispensing of medicines to:

- Manage **inbound and outbound** processes
- **Print** SSCCs (Serialized Shipping Container Codes)
- **Scan** serialized items for verification and decommissioning with Movilitas Mobile

HOW DOES IT WORK?

SERIALIZED MANUFACTURING

Generate serial numbers for trade items, bundles, cases, and pallets. Provide these numbers to Contract Manufacturing Organisations (CMO), print labels, or release them to production lines to print serial numbers on your products.

API/WEBHOOK INTEGRATION

Integration with your ERP, WMS, and packaging lines can be established with our REST API endpoints and webhook subscriptions.

REGULATORY CHANNELS

Connections to governmental systems in Europe, Russia, Middle-East, and Asia. Also, support for US DSCSA legislation.

LABEL PRINTING

Printing of sGTIN, SSCC, and Chinese labels.

MOVILITAS MOBILE

Mobile extension of Movilitas.Cloud to allow scanning on mobile devices. Available in AppStore (iOS) and Google Play (Android). Support for matrix scanning to scan many codes at once.

REPOSITORY/COLLABORATION CHANNELS

Besides working stand-alone, the system can be integrated with existing repository or collaboration systems like SAP ATTP, SAP ICH, and Tracelink.

SERIALIZED LOGISTICS

Scan serialized items for inbound and outbound processes. Scan items for verification or decommissioning.

WHERE DO WE APPLY IT?

55+
TENANTS

Markets

- Life Sciences
- Agro Chemicals

100+
USERS

Legislations

- FMD Europe
- (EMVS & NMVSs)
- Russia (OMS, MDLP)
- US DSCSA (VRS)
- Indonesia BPOM
- UAE Tatmeen

300+
CHANNELS

Companies

- Manufacturers (CMO/ MAH)
- Distributors (Wholesalers, 3PL)
- Dispensers (Pharmacy, Hospitals)

WHAT VALUE FOR OUR CUSTOMERS?

EASY TO USE AND INSTANT SETUP

Movilitas.Cloud's modern and intuitive UI requires minimal to no training and is configurable to IT and non-IT needs. Forget lengthy implementations.

INTEGRATE YOUR ENVIRONMENT WITH A CLICK

Have full control over the integration with your packaging lines, printers, ERP/WMS, business partners, and regulatory systems in one place.

SECURE AND RELIABLE INFRASTRUCTURE

Movilitas.Cloud is hosted in three geographically split data centers to provide a fully high available infrastructure with even a fourth data center in case of disaster recovery.

PAY AS YOU USE, NO RISK TRIAL

We'll only charge you monthly based on the options and users you configured. If you cancel within 30 days of signing up, we won't charge you.

TECHNOLOGICAL FEATURES

Multi-tenant

Companies can self-register and have their environment immediately available

Software NiceLabel Label Cloud

Connect to any on-premise printer and have central label storage

Digital Twin concept

Access to digital twins can be shared among tenants (partnerships)

Mobile Application

Native mobile scanning application for iOS, Android and web access

Non-SQL Database

Unlimited storage capacity and performant access

REST APIs and Webhooks

Allow building custom integrations with existing on-premise systems

Zebra Cloud Connect

Connect Zebra Cloud Connect printers straight to Movilitas.Cloud
